Energy Economics

Index to Volume 4
January, April, July, October 1982

Articles – titles

Electricity supply and demand

Assessing the need for power: a regional econometric model. *W. S. Chern* and *R. E. Just.* 4.4, 232–239
Causal responsibility and peak load pricing. *S. V. Berg.* 4.4, 246–250
Combined heat and power economics. *I. M. Dobbs.* 4.4, 276–285
Economic costs of electricity supply interruptions: US and foreign experience. *A. P. Sanghvi.* 4.3, 180–198
Optimal reserve capacities for electricity generation: a stochastically based risk–benefit approach. *S. P. Mauch* and *P. Marti.* 4.4, 251–258

Energy demand and energy efficiency

Combined heat and power economics. *I. M. Dobbs.* 4.4, 276–285
District heating for the city of Ghent: results of a project appraisal study. *A. Verbruggen* and *P. van Speybroeck.* 4.2, 111–120
The economics of home heating: further findings. *G. Capper* and *A. Scott.* 4.2, 134–138
Efficiency aspects of electric utility coal operations. *J. J. Gonzales.* 4.2, 127–133
Energy conservation in the UK. *G. F. Ray* and *J. Morel,* 4.2, 83–97
Energy prices, labour productivity and causality: an empirical examination. *N. D. Uri* and *S. A. Hassanein.* 4.2, 98–104
Energy use and structural changes: factors behind the fall in Sweden's energy output ratio. *G. Östblom.* 4.1, 21–28
The impact of the first oil crisis on energy demand in Korea. *E. Shin.* 4.4, 259–267
An input–output framework for analysing energy consumption. *S. Park.* 4.2, 105–110
Residential energy use: analysis of disaggregate data. *E. Hirst, R. Goeltz* and *J. Carney.* 4.2, 74–82
Structuring industrial energy use: a UK case study. *R. K. Cattell.* 4.4, 268–275
Synthetic demand functions for solar energy. *N. Manning* and *R. Rees.* 4.4, 225–231
A thermodynamic approach to economics. *J. Bryant.* 4.1, 36–50

Energy–economy interactions

An aggregate model for energy costs: national product interdependence. *J. E. Samouilidis* and *C. S. Mitropoulos.* 4.3, 199–206
Energy prices, labour productivity and causality. *N. D. Uri* and *S. A. Hassanein.* 4.2, 98–104
Energy use and structural changes: factors behind the fall in Sweden's energy output ratio. *G. Östblom.* 4.1, 21–28
On measuring the effects of higher energy prices. *A. Bopp* and *G. M. Lady.* 4.4, 218–224
Oil price and inflation. *P. E. Thoresen.* 4.2, 121–126
The price of oil and economic activity: a short-run model. *G. Fishelson.* 4.1, 2–6
A thermodynamic approach to economics. *J. Bryant.* 4.1, 36–50

Energy models

An aggregate model for energy costs: national product interdependence. *J. E. Samouilidis* and *C. S. Mitropoulos.* 4.3, 199–206
Assessing the need for power: a regional econometric model. *W. S. Chern* and *R. E. Just.* 4.4, 232–239
The Averch–Johnson model with Leontief production functions: extensions and applications. *F. H. Murphy* and *A. L. Soyster.* 4.3, 169–179
District heating for the city of Ghent: results of a project appraisal study. *A. Verbruggen* and *P. van Speybroeck.* 4.2, 111–120
The economics of house heating: further findings. *G. Capper* and *A. Scott.* 4.2, 134–138
Efficiency aspects of electric utility coal operations. *J. J. Gonzales.* 4.2, 127–133
The GENESYS model of OPEC, 1974–80: structural insights from a non-forecasting model. *R. E. Kuenne.* 4.3, 146–158
An input–output framework for analysing energy consumption. *S. Park.* 4.2, 105–110
On measuring the effects of higher energy prices. *A. Bopp* and *G. M. Lady.* 4.4, 218–224
Measuring the validity and performance of energy models. *W. C. Labys.* 4.3, 159–168
Optimal policies for investment and depletion in an oil-rich industrialized economy. *Homa Motamen.* 4.1, 7–20
Optimal reserve capacities for electricity generation: a stochastically based risk–benefit approach. *S. P. Mauch* and *P. Marti.* 4.4, 251–258
The price of oil and economic activity: a short-run model. *G. Fishelson.* 4.1, 2–6

Exhaustible resource economics

The comparative metastatics of the theory of the mine. *P. J. Crabbe.* 4.4, 240–245
Optimal policies for investment and depletion in an oil-rich industrialized economy. *Homa Motamen.* 4.1, 7–20

Oil supply and demand

Economic oil stockpiles: analytical solution for minima. *E. G. Read.* 4.1, 29–35

The impact of the first oil crisis on energy demand in Korea. *E. Shin.* 4.4, 259–267
Oil price and inflation. *P. E. Thoresen.* 4.2, 121–126
Reducing dependence on oil imports. *D. Kline* and *J. P. Weyant.* 4.1, 51–64

Book reviews

Dimensions of Energy Economics by Noel D. Uri (D. Pearce). 4.4, 286
Energy and Architecture: The Solar and Conservative Potential by C. Flavin (D. Cavard). 4.2, 140–141
Energy Future edited by R. Stobaugh and D. Yergin (K. V. Nagarajan). 4.1, 65–66
Future Energy Policies for the UK: An Optimal Control Approach by Dipak Basu (W. Peterson). 4.3, 207–208
The Myth of the OPEC Cartel: The Role of Saudi Arabia by A. D. Johany (M. Beudell). 4.2, 139–140
The Political Economy of Oil by F. E. Banks (R. E. Kuenne). 4.1, 65

Rejoinders

Elasticities – science or fiction?: a comment. M. M. Ali. 4.2, 141–142
Reply. G. Kouris. 4.2, 142–143
Energy forecasting – the science of the art. J. Herbert. 4.3, 208–210
Reply. S. Koreisha. 4.3, 210–211
